

The Bonfire Patio & Deck Gas Heater with Torch Flame

The Bonfire Patio & Deck Gas Heater amazes with design features that outsmart traditional patio heaters in two ways:

Design: Present an upscale design & look and the romance of a bonfire with your outdoor entertaining setting.

The Bonfire in action: showing off the stainless steel panels version.

Functionality of Heating: While standard patio gas heaters reflect the heat only from the top, the Bonfire Patio & Deck Gas Heater heats already where the glass tube starts at a height of approximately 36"(91.5cm). So when standing or seated next to the Bonfire, you will enjoy light effects and cozy warm air at the same time.

Product Features:

- The Bonfire Patio & Deck Gas Heater, certified CSA 2,37A-2008 ANSI Z83.26A 2008 (CE standard ID NO.845BS-0016).
- Wind-proof Design
- Made of stainless steel type 201, additionally protected against surface corrosion with steel varnish coating.
- BTU rating is 31200/31500 depending on type of gas. Heat Output: 9.3kw, consumption up to 28.2 ounces / 800 gram per hour. A 20Lbs propane tank lasts 8-20 hours depending on low or high flame.
- Tilt off and flame off protection
- Electronic ignition
- Gas burner made of top quality nickel-stainless steel
- Includes gas pipe/hose and pressure regulator. Regulator allows to adjust the size of flame
- Heat resistant glass tube made in Japan (best quality for lenses/glass products in the world)
- Wheels option and black storage zipper bag included
- Reflector is made of 1.2mm strong Aluminum

Dimensions & Delivery:

- Overall size - L: 25 1/2"(65cm) W:25 1/2"(65cm) H: 86 5/8"(220cm)
- Weight: 57.3lbs / 26kg (without gas tank / gas tank is not included in delivery)
- Box Size: L: 55"(140cm) W: 31"(79cm) H: 8"(20cm) / 7 UNITS on a standard 40x48 pallet.
- Tank compartment size (inside platform to burner): Bottom Width: 17 1/8"(43.5cm)
Top Width: 13 3/8"(34cm) / H: 29 1/8"(74cm)
